Accounting: Introduction to Financial Accounting Feb 26 2023
This book contains the solutions to problems in the main Introduction to Financial Accounting Textbook. This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced

topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student.
